

UPDATE 27 18 AUG 19

GENERAL UPDATE 27/2019-
The NHF Project- Progress Report-WEEK ENDING 18 AUG 19

Michael Hough AM
HARS Navy Heritage Flight Project Leader

As usual, this NHF project report focuses on the actual activities occurring in this last week, which were:-Continuing to prepare Tracker 844 for flight /Advising of a Tracker reunion being planned for October 2019/ Rebuilding the fuselage of the Sea Venom/ Adding to the Fitting of Blades on Wessex 832/ Preparing for C47 Move to Albion Park .

It is my pleasure to now update you on the progress we are making, thanks to a lot of very enthusiastic people

Here is a very brief summary of each current NHF project-

***Trackers 844 and 845**

These are both still located in secure but open storage at our major sponsor Air Affairs at the Albatross Aviation Technology Park (AATP), where:-

- 844 is received its regular weekly runup and engineering checks by HARS volunteers, and the successful engine run week, again continued the sequence of weekly checks with the Tracker running well! At present, we are sourcing batteries for the emergency backup system in preparation for flight
- 845 is in open storage at our major sponsor AIR AFFAIRS, and our long- term intention is to repaint it externally, and use it as the first display aircraft on the block of land next to the FAA Museum when this is granted by EIG
- **CLAIM THE DATE:- Tracker Reunion 23-24 October 2019.** Venue: HARS at Albion Park, over two days. This event is being organised by Bruce Saville, who runs the “Friends of the RAN Grumman Tracker” Facebook page. You can register interest in attending the re-union by going to:-
<https://www.facebook.com/groups/703844286295816/events/>

***Dakota C47**

We are planning to move the C47 to HARS Albion Park soon with the generous sponsorship of Chris Sievers at Air Affairs, and photos of the Wings in storage at HARS are attached

***Wessex**

- Wessex 832 is on display at HARS Albion Park in HARS Hangar 3 and this week we have attached some shots of the HARS paint team preparing the Rotor Blade saddle units for the future task of reattaching the main Rotor blades to the aircraft. I also repeat my recent request:-
 - A REQUEST- WE ARE LOOKING FOR PHOTOS OR PLANS (or INTERIOR SKETCHES) OF THE INTERIOR FIT-OUT OF THE WESSEX IN ANTI-SUBMARINE ROLE- Can anyone assist please, and we will happily scan and return any photo originals you can loan us temporarily. We would like to put a computer simulation of an ASW attack by a Wessex into the cargo hold, and the requested photos/ plans will guide us in that fit-out task.

UPDATE 27 18 AUG 19

- Wessex 813 is at HARS Parkes - no update received this week

We are still short of qualified/ knowledgeable Wessex support team members so if anyone out there can assist us, we would really welcome your enquiry about joining HARS and if accepted, coming to assist with a particular project such as the Wessex.

***Sea Venom**

Following are progress shots from our restoration Team that the external reassembly of the Sea Venom is largely completed, and the team is now focusing on re-assembling the cockpit- again illustrating how much has been achieved in re-assembling the Sea Venom over a very short time period:-

Once again- a big "Thank You Very Much!" to everyone who is helping with this challenging project.

- YES YOU DO HELP:- Two weekly reports ago I asked for financial support for the need to get some complex shape machining and welding done to remake a small but necessary wing component and the machining and welding cost is \$200. I am delighted to report that a generous donor contacted me last week and we have now received a full donation for the requested amount. THANK YOU!

***Hueys**

Iroquois UH-1B Numbers 893 and 898 are at Air Affairs at AATP in secure storage and there has been no change in their status this week.

***Sea Fury**

- Sea Fury WG 630 airframe is still on display in HARS Hangar 1 and is already a very popular display item, and the attached photos show Tracker 851 and the Sea Fury on display in HARS Hangar 1

We have commenced our major Sea Fury appeal- help us to develop the engineering analysis which is the start the rebuild of this magnificent Sea Fury historic airframe back to flying status!

We Request Your Support:-

Don't forget that donations to HARS of over \$2 are tax deductible so please act now and **if you can assist in any way-please email me at:- harsnhf@hars.org.au. or contact me through our HARS NHF Facebook page**

In the meantime, enjoy the accompanying photos of NHF related activities at HARS Albion Park:- C47 Wings/ Wessex 832 Rotor support frames/ Sea Venom re-assembly- progress photos / Sea Fury and Tracker

Enjoy!
